Our main focus is on the interior design of houses and apartments. GERMAN HOMESTYLE helps chinese customers to create their individual home in German style.

To make this possible, we are establishing GERMAN HOMESTYLE business centers in China. These are all built in the same significant temporary German architecture and host the offices of our member-brands. They offer the possibility of a united marketing, united training and united logistics.

From there we organize exhibitions and road-shows for the B2C-business and offer training for our B2B-partners. GERMAN HOMESTYLE also means German craftsmanship and German service.
